

Save money and avoid extra trips to the supermarket by reducing food waste at home!! 🍏🍊🥑🍅🍌🥬

This not only makes sense for consumers, but also for the environment. It is estimated that 30 to 40 percent of our country's food supply ends up as food waste. This wastefulness has a negative impact on the environment due to the enormous use of natural resources expended in getting food from seed to table. Large amounts of greenhouse gas are emitted in the farming, transporting, manufacturing and disposing of food that is wasted. Waste composition studies have found that between 20 to 25 percent of disposed trash is food waste!

Learn how to reduce food waste at home at www.nj.gov/dep/dshw/recycling/Food%20Waste%20Resources%20Webpage.pdf. Wasting food is a terrible waste! #TooGoodToWaste

**Food is
Too Good
to Waste**

With online purchasing more popular than ever, remember to recycle all of those corrugated cardboard boxes used to ship your orders! ♻️📦♻️

Old corrugated cardboard boxes are used to make new boxes. By recycling, you are providing industry with important raw materials and helping the environment at the same time!! 🌍

Learn more about recycling by visiting your municipality's recycling website, the Recycle Coach information system and recycle.nj.gov.

recycle right NJ

Recycle corrugated cardboard packaging to give it another life.
