Re: 621 Valley Road, Long Hill, N.J.

Mr. Orth,

The revised attached set of drawings dated 2.5.21 reflect the following changes from the previously submitted drawings:

- Dimensions have been provided in parking garage
- Parking spaces that allow for a 12" clearance in front of the standard 9'x18' parking stall have been designated as: 19'
- Wall immediately adjacent to parking stalls have been moved away from the parking stall to allow for better maneuverability.
- Overhead garage doors have been increased to 10' wide.
- Apartment count on drawing PB-100 has been corrected.
- Building is now 3' narrower so that 18" roof overhang on each side doesn't project into required side yards.
- A monument sign detail has to been provided to the civil engineer to incorporate into their drawings.
- Attached is letter addressing code requirements for Fire Department Access around the building.

Respectfully,

John Saracco
